

# Zugang zu den PACE Daten und Microservices über flexible, standardisierte APIs ermöglichen einfache Skalierung des B2B Geschäfts

The screenshot shows the PACE Developer Hub website. The header includes the PACE logo and navigation links: OPEN PLATFORM, GET ACCESS, ABOUT PACE, and JOBS. The main heading is "Upgrade your service with PACE" with a subtext: "Connect to our cloud system, add new features and functionality, and create exciting experiences for your users." Below this are buttons for "Cloud APIs" and "Cloud SDKs". The main content area features six service cards, each with an icon, a title, a brief description, and a "Documentation" button:

- POI**: Access data about points of interest. Locate gas stations in your vicinity, filter for different location types and more.
- Fueling**: Allow users to pay for their gas with their smartphone. Search for gas stations where cashless pay is available and transfer the payment.
- Pay**: Manage payment processes. Users can enter and save different payment methods like credit card information or bank details.
- DTC**: Get information about Diagnostic Trouble Codes reported by a specific car as well as tips about how to handle them best.
- Cars**: Gain information about cars supported by PACE.
- Trips**: Gain access to trip information recorded with PACE. This also includes various data for each point in time of a trip like speed, location, technical data.
